Elliptical Tanks

Elliptical tanks can be selected for stationary or transportable (non-D.O.T. regulated) applications both indoors and outdoors. The elliptical tank lowers the center of gravity to enhance stability and visibility. The tanks feature a collection sump on the bottom for full drain out. These tanks require the bottom to be fully supported with a cradle for use. The tanks are manufactured for medium-density polyethylene with U.V. stabilizers and designed for containment of liquids up to 1.7 specific gravity. Tank walls are translucent for level viewing and equipped with gallon indicators.
